BID JANUARY 11, 2011
COMPLETED DECEMBER 2011

CONSTRUCTION COST:
\$1,389,260
4,300 S.F. ADDITION TO THE
HIGH SCHOOL

The center provides areas for weight training and cardiovascular exercise, as well as a school spirit store and storage areas.

The heating/ventilating/air conditioning system has several sustainable features:

- Variable speed drive
- Merv 13 filters for better air quality
- Demand control ventilation
- Hot gas reheat for dehumidification
- R-410 refrigerant (contains HFC not HCFC)
- Supply air ductwork is fabric instead of sheet metal

The addition also has a reflective roof, and the project was completed with minimal disturbance on a tight site near a stream.
