218,444 S.F. OF TOTAL AREA

This non-reimbursable project addressed several capital improvements needs for a landmark historic building overlooking downtown Ellwood City.

Additions expanded the District Administrative Offices, Guidance and Principal offices. A new addition enlarged the weight room and locker room, athletic storage, and large group instruction area.

Alterations were made to the entrance corridors and cafeteria. The roof and HVAC systems were replaced, and cafeteria air conditioning added. The gymnasium renovations included new flooring, bleachers, operable wall and athletic equipment. Worn exterior windows and doors to the stately auditorium now have period replacements. Exterior steps were completely replaced, and new office furnishings and kitchen equipment purchased.
