COMPLETED FALL 2006

6,150 S.F. OF NEW
CONSTRUCTION

TOTAL CONSTRUCTION COST:
\$ 2,417,798

Scope of work includes the re-roofing of the entire complex, demolition of obsolete spaces, and the addition of approximately 6,500 square feet of space to the rear of the building to be used primarily as a dining hall facility. The architecturally sensitive addition contains sectional partitions to enable its conversion into classrooms and meeting areas.

Following this profile are floor plans for each level of the building (A-1 to A-3). Two A-1 sheets are included, one showing the dining hall with the partitions closed, and the other showing the partitions open to create additional program areas.
